

Allegro Express USB
USB 2.0 Adapter Card for PCI Express

Allegro Express USB adds full bandwidth USB connections for countless peripheral devices including external keyboards, mice, iPods, mobile digital devices, printers, etc., and unlike an external hub, it does not share the bandwidth of an existing port. This card

supports simultaneous low-, full-, and hi-speed device connections. Allegro Express USB may be installed in any PCI Express slot, and is RoHS compliant.

Features:

- 4 external + 1 internal USB 2.0 ports
- Supports all industry standard USB 1.1 and 2.0 peripherals
- Supports data transfers at up to 480 Mbps, per port
- Supports hot-swappable device connection
- Native PCI Express (PCIe) x1 host bus interface
- Easy installation—Plug and play—no drivers to install
- Compatible with Mac Pro, Xserve, and PCI Express models of Power Mac G5 and Windows PCs
