N SMANN [®]	Material - Safety - Data Sheet (MSDS) for Ansmann Lithium-Manganese-Dioxide (Li-metal) Batteries single cells and multi-cell battery packs	
Revision no: 5	The information contained within is provided as a service to our customers and for their information only. The information and recommendations set forth here are made in good faith and are believed to be accurate at the date of preparation ANSMANN AG makes no warranty expressed or implied.	in
Product and Supplier Ide	ntification	
Product names:	"ANSMANN CR" Lithium Photo Battery; ANSMANN CR" Lithium Button C "ANSMANN EXTREME Lithium"; "ANSMANN INDUSTRIAL Lithium"	Cel
Designation:	Lithium Metal Battery	
Models / types:	CR123, CR2, CR-P2, 2CR5	
	CR1025,CR1216, CR1220, CR1225, CR1616, CR1620, CR1632, CR2016 CR2025, CR2032, CR2330, CR2354, CR2430, CR2450, CR2477, CR3032	
	E-Block, 9V, (CR-V9, ER9V)	
Electrochemical system:	Li-MnO ₂ (Lithium-Manganse-Dioxide)	
Supplier: Germany Address: Phone / Facsimile: Home / email:	ANSMANN AG Industriestraße 10; 97959 Assamstadt; Germany + 49 (0) 6294 42040 / + 49 (0) 6294 420444 ansmann.de / info@ansmann.de	
USA Address: Phone / Facsimile: email:	ANSMANN USA Corporation 1001 Lower Landing Rd. Ste 101; Blackwood, NJ08012; USA +1 973 4395244 1012 / +1 973 2062006 USA@ansmann.de	
United Kingdom Address: Phone / Facsimile: email:	ANSMANN UK LTD. Units 11-12, RO24, Harlow Business Park, Harlow, Essex. CM19 5QB. UK +44 (0) 870 609 2233 / +44 (0) 870609 2234 UK@ansmann.de	
Hong Kong Address:	ANSMANN Energy Int. LTD. Unit 3117-18, 31/F; Tower 1; Millenium City 1; No. 388 Kwun Tong Road; Kwun Tong, kowloon; Hong-Kong hongkong@ansmann.de	
China Address:	HuiZhou City ANSMANN Trading Co. LTD Da Lian Industrial Park, Rengtu Village Ruhu Town Huicheng District, 516169 Huizhou City Guangdong, China china@ansmann.de	
Sweden Address:	ANSMANN Nordic AB Victor Hasselblads Gata 11, 421 31 Västra Frölunda, Sweden nordic@ansmann.de	
EMERGENCY CONTACT:	For chemical emergency only (spill, leak, fire, exposure or accident) call CHEMTREC at: 800-424-9300 within the USA and Canada +1 703-527-3887 outside the USA and Canada	
	Non-emergency calls cannot be serviced at this number.	

The Lithium-Manganese-Dioxide batteries described in this MSDS are hermetically sealed units, which are not hazardous when used according to the recommendations of the manufacturer. Under normal condition of use of the batteries, the electrode materials and the liquid electrolyte they contained are non-reactive provided the battery integrity is maintainted. Risk of exposure exists only in case of mechanical, electrical or thermal abuse. Thus the batteries should not short circuited, recharged, punctured, incinerated, crushed, immersed in water, force discharged or exposed to temperatures above the temperature range of the cell or battery. In these cases there is risk of fire or explosion.

Material - Safety - Data Sheet (MSDS) for

Ansmann Lithium-Manganese-Dioxide (Li-metal) Batteries

single cells and multi-cell battery packs

2/7

No.4

3. **Composition and Informations on Ingredients**

Each cell consists of a hermetically sealed metallic container containing a number of chemicals and materials of construction of which the following could potentially be hazardous upon release.

Ingredient	Content	CAS No.	CHIP Classification
Lithium (Li)	2 - 5%	7439-93-2	F;C R14/15; R34 S43C; S45; S8
Manganese Dioxide (MnO ₂)	15 - 45%	1313-13-9	Xn R20/22 S25
Propylene Carbonate	<10%	108-32-7	Xi R36 S24/25
1,2-Dimethoxyethane	<10%	110-71-4	F;T R11; R19; R20; R60; R61 S45; S53
Lithium trifluoromethyl sulfonate (only Photo Batteries)	<5%	33454-82-9	Xi R36/37/38 S26; S37/39
Lithium Perchlorate (only Button Cells)	<1%	7791-03-9	O; Xn R20/22; R36/37/38; R9 S17; S26; S27; S36/37/38
Graphite, synthetic (only Button Cells)	3 - 10%	7440-44-0	S22; S24/25
stainless steel	30 - 75%	7439-89-6	
plastic	0 -10%		

	Remark:	The weight of metallic lithium per cell is: The weight of metallic lithium per battery (2CR5, CR-P2, 9V-E-block) is:	≤ 1g ≤ 2g
4			

4.	<u>First Aid Measures</u>	
	Inhalation:	Provide fresh air. In severe cases obtain medical attention.
	Skin Contact:	Wash off skin thoroughly with water. Remove contaminated clothing and wash before re-use. In severe cases obtain medical attention.
	Eye Contact:	Irrigate thoroughly with water for at least 15 minutes. Lifting upper and lower lids, until no evidence of the chemical remains. Obtain medical attention.
	Ingestion:	Wash out mouth thoroughly with water. Do not induce vomiting or give food or drink. Seek medical attention immediately.
	Further treatment:	All cases of eye contamination, persistent skin irritation and casualities who have swallowed this substance or been affected by breathing its vapours should be seen by a doctor.
5.	Product and Supplier I	dentification
	down burning Li- MnO ₂ cell that the lithium metal they Do not use for this purpose	preferably, copious quantities of water or water-based foam, can be used to cool Is and batteries, as long as the extent of the fire has not progressed to the point contain is exposed (marked by deep red flames). a sand, dry powder or soda ash, graphite powder or fire blankets. extinguishers on raw lithium.
	Extinguishing media	Use water or CO_2 on burning Li-MnO ₂ cells or batteries and class D fire

extinguishing agent only on raw lithium.

6. Accidental Release Measures

Remove personnel from area until fumes dissipate. Do not breathe vapours or touch liquid with bare hands.

If the skin has come into contact with the electrolyte, it should be washed thoroughly with water.

Sand or earth should be used to absorb any exuded material. Seal leaking battery and contaminated absorbent material in plastic bag and dispose of as Special Waste in accordance with local regulations.

7. Precautions for safe Handling and Use

Precautions for safe Handling and Use			
Storage:	Store in a cool (preferable below 30°C), well ventilated area, away from moisture, sources of heat, open flames, food and drink. Elevated temperatures can result in shortened battery life. Temperautes above 100°C may result in battery leakage and rupture. In locations that handle large quantities of lithium batteries, such as warehouses, lithium batteries should be isolated from unnecessary combustibles. Keep batteries in original packaging until use and do not jumble them.		
Mechanical			
Containment:	If potting or sealing the battery in an airtight or watertight container is required, consult Ansmann AG representative for precautionary suggestions. Do not obstruct safety release vents on batteries. Encapsulation of batteries will not allow cell venting and can cause high pressure rupture.		
Handling:	Accidental short circuit for a few seconds will not seriously affect the battery. Prolonged short-circuit will cause the battery to lose energy, generate significant heat and cause the safety vent release vent to open. Sources of short-circuits include jumbled batteries in bulk containers, metal jewelry, metal covered tables or metal belts used for assembly of batteries into devices. Damaging a lithium battery may result in an internal short circuit.		
•	ry, including a vented battery, when exposed to water, may result in a fire and / or ed batteries may result in a fire.		
If soldering or welding to the battery is required, consult your Ansmann representative for proper precautions to prevent seal damage or short-circuit.			
Charging:	Do not charge this batteries! This battery type is manufactured in a ready-to-use-state. It is not designed for recharging.		
Recharging can cause battery leakage, or in some cases, can cause the safety release vent to open. Inadvertent charging can occur if a battery is installed backwards.			
	Storage: Mechanical Containment: Handling: The contents of an open battle explosion. Crushed or damage If soldering or welding to the b prevent seal damage or short- Charging: Recharging can cause battery		

Disposal:

Dispose in accordance with all applicable federal, state and local regulations.

Special Protection Information 8. **Ventilation Requirements:** Not necessary under normal conditions. Room ventilation may be required in areas where there are open or leaking batteries. **Respiratory Protection:** Not necessary under normal conditions. Avoid exposure to electrolyte fumes from open or leaking battery. In all fire situations, use self-contained breathing apparatus **Eye Protection:** Not necessary under normal conditions. Wear safety glasses with side shields if handling an open or leaking battery. Hand Protection: Not necessary under normal conditions. Use neoprene or natural rubber gloves if handling an open or leaking battery Other: Not necessary under normal conditions. Use chemical apron in case of leakage

Ansmann Lithium-Manganese-Dioxide (Li-metal) Batteries single cells and multi-cell battery packs

4/7

			4/7
9.	Physical and Chemical P	roperties	
	Appearance:	cylindrical shape	
	Odour:	not applicable; unless in case of leakage, then smell of ether appears	
	Flash Point:	not applicable; unless individual components exposed	
	Flammability:	not applicable; unless individual components exposed	
	Relative density:	not applicable; unless individual components exposed	
	Solubility (water):	not applicable; unless individual components exposed	
	Solubility (other):	not applicable; unless individual components exposed	
10.	Stability and Reactivity		
	Product is stable under condit	ions described in Section 7.	
	Conditions to avoid:	Heat above 100° or incinerate. Deform. Mutilate. Crush. Pierce. Disassemble. Recharge. Short circuit. Expose over a long period to humid conditions.	
	Materials to avoid:	Oxidising agents, alkalis, water.	
	Hazardous reactions:	Lithium metal reacts with water to produce highly flammable gases	
	Hazardous decomposition reactions:	Toxic fumes, and may form peroxides	
1.	Toxicological Information	<u>1</u>	
	Signs & symptoms:	None, unless battery ruptures. In the event of exposure to internal contents, vapour fumes may be very irritating to the eyes and skin.	
	Inhalation:	Lung irritant	
	Skin contact:	Skin irritant	
	Eye contact:	Eye irritant	
	Ingestion:	Poisoning if swallowed	
	Medical conditions aggravated by exposure:	In the event of exposure to internal contents, moderate to severe irritation, burr and dryness of the skin may occur. Target organs nerves, liver and kidneys.	ning
12.	Ecological Information		
	Mammalian effects:	None known if used / disposed of correctly	
	Eco-toxicity:	None known if used / disposed of correctly	
	Environmental fate:	None known if used / disposed of correctly	
3.	Disposal Information		
 Disposal Information Do not incinerate, recharge, disassemble short, or subject cells to temperatures in excess of 100 Such abuse can result in loss of seal, leakage, and/or cell explosion. Dispose of in accordance wappropriate local regulations. When properly used and disposed the battery does not present environmental hazard. The batter contain mercury, cadmium, or lead. Do not let internal components enter marine environment. Avoid release to waterways, wastewater or ground water. USA: Batteries must be completely discharged prior to disposal and / or the terminals must be capped to prevent short circuit. This product does not contain any materials listed by the United requiring specific waste disposal requirements. When completely discharged it is not considered Disposal of large quantities of lithium power cells may be subject to Federal, State, or Local regulations. 			
	DIRECTIVE 2006/66/EC OF 1	facturing, handling and disposal of batteries is regulated on the basis of the THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 6 September 2006 on ad waste batteries and accumulators and repealing Directive 91/157/EEC.	n
