

Product Sheet

The FL Studio, ASTRA backlit keyboard

The ASTRA Keyboard is designed to work in any lighting environments. With 5 different light levels to choose from, the Astra is optimal from day to night, from bright rooms to low lights, with just a tap of your finger. We engineered one wire for the USB hub and a separate one for the keyboard. It's perfect for editing systems that use USB KVM extenders as well as installations that require data security.
